

FACTORY ACCEPTANCE

PEACE OF MIND FROM THE START

SouthWind's aircraft factory acceptance process provides you the confidence in knowing that the aircraft will be at its highest level of quality when you receive it. We're experts in every aspect of the aircraft, checking hundreds of items before we accept it from the factory on your behalf. There is no such thing as being too thorough. We are your advocate for even the smallest of details to ensure your aircraft investment is fully realized and your expectations exceeded.

THOROUGHNESS ADDS VALUE

New aircraft ownership can be an exciting yet stressful process to an owner. A proper factory acceptance can save thousands of dollars many times over. We will remain with your aircraft for several days as needed, until it is exactly as desired. We can walk you through the process or accept the aircraft on your behalf. We handle all three main segments: the pre-flight inspection, the flight inspection and systems check, and the final inspection and acceptance of the aircraft.

AIRCRAFT FLIGHT DELIVERY

WE FLY WHEREVER YOU NEED

SouthWind pilots have provided no-hassle ferry delivery on all types of aircraft, all over the world. As small as single-engine pistons. As large as midsize jets. We've transported thousands of aircraft in factory-delivered condition. Our auxiliary fuel cells, approved by the FAA, increase the range of aircraft, allowing our skilled pilots to bypass expensive and potentially dangerous routes.

HELD TO A HIGHER STANDARD

Our pilots are highly trained and qualified, holding specific type-ratings for the aircraft. Each crew member is carefully vetted to our operation and high standards. We strive to build professional and personal relationships with each mission, going above and beyond what other companies deem acceptable. Our crews can provide training, mentoring, and other crew support ensuring you're comfortable in your new aircraft.

SHIPPING DELIVERY

PERFECTING CONTAINERIZATION

An aircraft in the air is a breathtaking and beautiful thing. It should look equally impressive even when inside a crate. SouthWind has mastered the art of aircraft shipping and containerization. We overengineer to ensure that when aircraft are packaged, containerized and shipped they are secure from any hazard. Our proprietary packaging is 10 times stronger than necessary to protect aircraft from any potential risk that truck, railroad, oceanic transport or airfreight has to offer.

THOUSANDS OF AIRCRAFT WITHOUT DAMAGE

We calculate, prepare and then implement great precautions to make sure that your aircraft will arrive safely, timely and without a scratch. Since 1985, our reputation for undamaged aircraft is as secure as the aircraft themselves. We have shipped more than 1,000 aircraft over decades – all without an insurance claim. That's why SouthWind is the preferred choice for manufacturers in our region for shipping and reassembly of new aircraft deliveries around the globe.

PILOT AND CREW SERVICES

CONTRACT THE MOST EXPERIENCED CREWS

SouthWind offers some of the industry's most experienced pilots available. These highly trained crews are available to operate a wide variety of aircraft, usually at a moment's notice. Unlike independent contract pilots, we provide support to ensure operations are as safe and efficient as possible. Count on our crew solutions for short- or long-term durations, or to cover your pilots' vacations, medical leave or other situations.

SAFER OPERATIONS WITH PILOT TRAINING AND FAMILIARIZATION

We offer comprehensive pilot training and familiarization to ensure your crew is able to operate the new aircraft safely and efficiently. We tailor our program and training to fit your needs and experience. Our professional staff can assist in the completion of Supervised Operational Experience requirements or provide introductory training before simulator training. We're with you until your crew is completely comfortable in the new aircraft.

MANAGED AIRCRAFT

DELIVERING EASE AND EFFICIENCY

We take great pride in our attention to all details of aircraft ownership. With our aircraft management and consulting services, we offer convenience to your ownership experience, delivering a superior level of ease and efficiency. Have confidence that your valuable assets and investments are being cared for with the highest regard. Our extensive resources and experience provide added security for your aircraft, guaranteeing it is always ready when needed, in excellent condition.

RELAX, WE HAVE IT COVERED

Managing the details of aircraft scheduling, crew management and compensation, maintenance tracking, facilities supervision, subscription services, contract fuel services, charts and even passenger ground transportation and lodging can be daunting. We take care of the details while you concentrate on what makes you successful. Our staff is experienced, detail-oriented and attentive to your needs and desires. Relax knowing that your safety, comfort and efficiency are handled.
